

## Tremco Barrier Solutions, Inc. Fact Sheet

- North America's #1 provider of residential new construction foundation barrier solutions
- Protecting Homes with Barrier Science<sup>SM</sup> for over 20 years
- Products are installed only through a national network of professionally trained Select Barrier Solutions Contractors
- Leading provider of Guaranteed Dry Basements – a variety of foundation waterproofing products designed to protect foundation walls from footing to sill plate

### Products:

- **TUFF-N-DRI<sup>®</sup> Basement Waterproofing System**, North America's #1 brand of basement waterproofing providing Guaranteed Dry Basements
  - Two-part system consists of a seamless membrane that seals out leaks and seepage from basement walls and an insulating foundation board on the outside that reduces condensation on the inside
  - Is backed by a 20-year transferable performance warranty
  - Provides comfortable basement living space for about half the cost of adding upstairs space
- **WATCHDOG WATERPROOFING<sup>®</sup>** provides reliable water protection for basements and retaining walls
  - Features a flexible, spray-applied polymer-enhanced asphalt membrane
  - Seamlessly bridges foundation-settling cracks
  - Is backed by a five-year transferable performance warranty
- **NEW Horizon<sup>™</sup> Foundation Finishing Systems** extend the waterproofing and energy efficiency of below-grade TUFF-N-DRI for complete full-wall protection
  - Includes the Horizon Insulated System, a two-part insulation and coating combination, and the Horizon Coating System, a coating-only system
  - Spray-applied TUFF-N-DRI membrane from footing to sill plate prevents moisture penetration
  - Horizon Insulated System includes an additional element, Horizon ThermoPanel<sup>™</sup>, which protects against energy loss and reduces interior condensation
  - Durable Horizon Coating System, available in matte and coarse finishes, repels moisture and gives the exposed foundation an attractive finished look
  - When installed with below-grade TUFF-N-DRI, the combination of TUFF-N-DRI and the above-grade Horizon Insulated System carries a full-wall 30-year performance warranty
- **DrainStar<sup>®</sup> Stripdrain** eliminates the need for traditional foundation drain tile and gravel as part of a complete waterproofing system
  - System consists of a rigid polymer core of engineered cones and wrapped in a non-woven, needle-punched geotextile fabric filter
  - No gravel is required, thus no scheduling of gravel deliveries or wheelbarrows of gravel to spill over the construction site
  - Provides builders with one-stop shopping for waterproofing and drainage needs
